The graph illustrates the relationship between the rate of interest (R) and the time period (t). The vertical axis represents the rate of interest (R), and the horizontal axis represents the time period (t). A straight line with a positive slope is drawn, starting from the origin. The area under this line is shaded in light blue. A dark blue arrow points to the shaded area. The formula $R = R \cdot \frac{T + t_2}{T + t_1}$ is written in the bottom right corner.

				t t T
				$R_1 = R \times 1.5^{(t_1 - t_2)/10}$ R R t
			 U	 t t

A diagram illustrating a 4x4 grid of squares. A diagonal line runs from the bottom-left corner to the top-right corner. The squares above the diagonal are shaded light blue. A dark blue arrow points to the bottom-left square.

			$\frac{1.05U_{ph}}{\sqrt{3}}$
